Pediatr Cardiol 20:455–461, 1999

Subject Index

CR — Case Report; LE — Letter to the Editor; A — Annotation

Acetylsalicylic acid, reduces coronary complications while treating Kawasaki disease; 177
Acute febrile neutrophilic dermatosis, cardiovascular involvement in (CR); 295
Acute myocarditis, in early stage of Kawasaki disease, cardiac troponin I for early diagnosis of; 184
Adhesion molecules, effect of cardiac surgery in children with and without cardiopulmonary bypass on serum levels of; 113
Adjustable systemic – pulmonary arterial shunt, concept of; 445
Adolescents, normal values for corrected sinus node recovery time in; 396
Aerobic capacity, after Fontan operation, exercise testing of; 57
Age, variable affecting cardiovascular response to exercise in children; 4
α *interferon*, for treating chronic myelomonocytic leukemia, myocardiopathy caused by (CR); 293
Anastomosis, double lumen aortic arch from persistent fifth aortic arch repaired by (CR); 167
Angiography, right ventricular function and left ventricular structure in hypoplastic left heart syndrome patients studied by; 422
Anomalous hepatic vein, heterotaxy syndrome from intrahepatic shunting after Fontan procedure managed by surgical ligation of (CR); 428
Anomalous origin of left coronary artery, tetralogy of Fallot with abnormal mitral valve and (CR); 438
Anomalous origin of pulmonary arteries, in patient with persistent truncus arteriosus, surgical correction of (CR); 298
Anthracycline, left ventricular diastolic dysfunction associated with myocardiac damage induced by; 252
ultrasound myocardial tissue characterization by integrated backscatter in children treated with; 264
Aortic arch, double lumen, with aortic coarctation due to persistent fifth aortic arch (CR); 167
Aortic arch anomalies, chromosome 22q11 deletion associated with; 97
Aortic arteritis, percutaneous transluminal balloon angioplasty for relieving stenosis of aorta due to; 404
Aortic coarctation, exercise testing before and after surgical repair of; 33
redilatation of restenosis after balloon angioplasty of (CR); 377
Turner's syndrome in patients with; 108
with double-lumen aortic arch due to persistent fifth aortic arch (CR); 167
Aortic dissection, adolescent with Marfan syndrome died of (CR); 431
caused by intraaortic balloon pump (CR); 373
Aortic root dimension, criterion for aortic root replacement in Marfan syndrome (CR); 431
Aortic stenosis, due to aortic arteritis relieved by percutaneous transluminal balloon angioplasty; 404
Aortic stent, long segment stenosis due to Takayasu's arteritis treated by (CR); 215
Aortic valve disease, Turner's syndrome in patients with; 108
Arrhythmias, after repair of tetralogy of Fallot, exercise studies showing; 39
after tetralogy of Fallot repair detected by electrocardiograms; 326
exercise testing of after atrial repair of transposition of great arteries; 49
low dose Sotalol for treatment of (LE); 172
ventricular, in children with abnormal endomyocardial biopsy, spontaneous resolution of (CR); 364
Arterial stiffness, in children with parental history of hypertension; 203
Arterial switch, post-Mustard procedure pulmonary venous obstruction repaired by (CR); 301
Atrial natriuretic peptide, effect of change in hemodynamics caused by dobutamine infusion on plasma concentration of; 343
Atrial pacing, permanent, Doppler echocardiography and transesophageal atrial pacing demonstrate efficacy of (CR); 218
Atrial septal defect, cardiac inflow obstruction resulting from surgical closure of Eustachian valve mistaken for (CR); 155
exercise testing before and after surgical closure of; 22
size distribution and closure rate for different sizes of; 195
spontaneous closure of; 195
Atrioventricular block, complete, noninvasive external pacing newborns with (CR); 290
Atrioventricular conduction, in hypertrophic obstructive cardiomyopathy, dual chamber pacemaker therapy for treatment of (CR); 229
Atrioventricular septal defect, complete, Ebstein's anomaly and (CR); 232
Atrioventricular valve, contralateral, in mitral and tricuspid valve atresia in neonates; 200
Autonomic nervous system, tilt testing on children with syncope causes abnormal changes in; 242
Bacteremia, dental, etiology of bacterial endocarditis not related to bleeding and intensity of; 317

Balloon angioplasty, for aortic coarctation, redilatation of restenosis after (CR); 377
long segment stenosis due to Takayasu's arteritis treated by (CR); 215
Balloon dilatation, pulmonary artery band disrupted by (LE); 308
Balloon valvuloplasty, critical pulmonary valve stenosis in premature neonate treated by (CR); 147
β *myosin heavy chain (β-MyHC) mutation*, familial hypertrophic cardiomyopathy and; 313
Biatrial myxomas, surgical intervention in child with (CR); 150
Blalock–Taussig shunt, effect on branch pulmonary artery growth in tetralogy of Fallot and pulmonary atresia with ventricular septal defect patients; 358
Blood oxygen saturation, arterial and peak exercise, effect of Fontan operation on; 57
Blood pressure, exercise training by hypertensive children reduces; 66
Body position, variable affecting cardiovascular response to exercise in children; 4
Bohemia, survival of children born with congenital heart disease in; 411
Book review, "Adult Congenital Heart Disease on CD-ROM," by Webb et al. (A); 263
"Echocardiographic Diagnosis of Congenital Heart Disease: An Embryonic and Anatomic Approach," by Valdes-Cruz and Cayre (A); 316
"The Athlete and Heart Disease: Diagnosis, Evaluation, and Management," by R.A. Williams (A); 247
Brain natriuretic peptide, effect of change in hemodynamics caused by dobutamine infusion on plasma concentration of; 343
Branch pulmonary artery growth, after Blalock–Taussig shunt in tetralogy of Fallot and pulmonary atresia with ventricular septal defect; 358
Cardiac catheterization, exercise studies of tetralogy of Fallot patients with; 39
neonatal, replaced by diagnosis echocardiography and therapeutic catheterization; 131
Tc-99m hexamethyl propylenamine oxime lung clearance for diagnosing pulmonary hypertension compared with; 271
Cardiac disease, role of elastin gene mutation in; 103
Cardiac metastases, clinical features and therapeutic procedures for; 401
Cardiac output, at rest and during exercise after intracardiac repair of tetralogy of Fallot; 39
Cardiac sequelae, of Kawasaki disease, effect of gamma-globulin dosage and timing of administration on; 248
Cardiac troponin I, acute stage of Kawasaki disease associated with increased levels of; 184
Cardiomyopathy, anthracycline-induced, left ventricular diastolic dysfunction associated with; 252
integrated backscatter measurement in children taking anthracycline detects; 264
reversible, secondary to α-interferon for chronic myelomonocytic leukemia in infant (CR); 293
Cardiopulmonary bypass, complement activation, cytokines, and adhesion molecules in children undergoing cardiac surgery with and without; 113
Cardiotoxicity, secondary to α-interferon for chronic myelomonocytic leukemia (CR); 293
Carotid diameter, smaller in children with parental history of hypertension; 203
CATCH22, aortic arch anomalies associated with; 97
Chordal rupture, in neonatal Marfan syndrome, acute mitral regurgitation due to (CR); 382
Chromosome 22q11 deletion, aortic arch anomalies associated with; 97
Chronic myelomonocytic leukemia, reversible cardiomyopathy secondary to α-interferon used to treat (CR); 293
Coil occlusion, of persistent ductus arteriosus, spontaneous resolution of hemolysis after (CR), 371
Complement components, effect of cardiac surgery in children with and without cardiopulmonary bypass on serum levels of; 113
Complete atrioventricular block, noninvasive external pacing newborns with (CR); 290
Complete heart block, intraperitoneal migration of epicardially placed pacemaker implanted for (CR); 164
Complications, following inhaled NO for treating pulmonary hypertension after surgical repair of total anomalous pulmonary venous return (CR); 224
Conduction disturbances, after tetralogy of Fallot repair, electrophysiological followup for detection of; 326
Congenital aneurysm of sinus of Valsalva, MRI-diagnosed rupture in right ventricle of (CR); 212
Congenital heart defects, in children with Down's syndrome, results of surgical treatment of; 351
prevalence and survival rate of children with; 411
Weaver syndrome and (CR); 375
Congenital heart disease, genetic syndromes associated with (LE); 236
hemodynamic abnormalities in fetuses with; 390
inhalation of low-dose nitric oxide for evaluating pulmonary vascular reactivity in children with; 278
low rate of in Malta; 355
Tc-99m hexamethyl propylenamine oxime lung clearance study for estimating pulmonary hypertension in; 271
Congenital left heart abnormalities, in families with sustained fetal arrhythmia (CR); 368
Congenital long QT syndrome, fetal presentation of (CR); 441
Congestive heart failure, percutaneous transluminal balloon angioplasty in aortic arteritis relieves; 404

Contrast echocardiography, role of atrial septal defect in case of exercise intolerance in Ebstein's anomaly evaluated by; 189
Coronary aneurysm, Kawasaki disease and; 177
Corrected sinus node recovery time, in adolescents, normal values for; 396
Cyclic guanosine monophosphate, effect of change in hemodynamics caused by dobutamine infusion on plasma concentration of; 343
Decompression, neonatal ductus arteriosus aneurysm treated with ligation and (CR); 158
Dental procedures, relationship between bacterial endocarditis and; 317
Diastolic function, anthracycline-induced myocardial damage associated with; 252
Dobutamine, changes in atrial and brain natriuretic peptides and cyclic guanosine monophosphate plasma concentration caused by infusion of; 343
Doppler echocardiography, diastolic dysfunction associated with anthracycline cardiomyopathy seen by; 252
role in predicting efficacy of permanent atrial pacing in patient with hypoplastic ventricle (CR); 218
Down's syndrome, results of surgical treatment of congenital heart defects in children with; 351
Ductus arteriosus aneurysm, neonatal, ligation and decompression for treatment of (CR); 158
Dysplastic tricuspid valve, management of tricuspid regurgitation associated with hydrops fetalis in patient with (CR); 435
Ebstein's anomaly, cardiorespiratory exercise tolerance in asymptomatic children with; 189
complete atrioventricular septal defect and (CR); 232
Echocardiography, branch pulmonary artery growth after Blalock–Taussig shunt studied by; 358
left ventricular dysfunction in infants with rickets seen by; 283
myocardial tissue evaluation by integrated backscatter method of; 264
nonobstructive hypertrophic cardiomyopathy in neonate seen in (CR); 208
pericardial hematoma in infant identified by (CR); 380
prevalence of congenital heart defects in Bohemian children born 1980–1990 confirmed by; 411
right ventricular function and left ventricular structure in hypoplastic left heart syndrome patients studied by; 422
Elastin gene mutation, familial supravalvular aortic stenosis and Williams' syndrome caused by; 103
Electrocardiography, exercise testing of obese children and; 79
long QT syndrome detected in fetuses by (CR); 441
role in detecting conduction disturbances and arrhythmias after repair of tetralogy of Fallot; 326
Endocarditis, bacterial, role of dental surgical procedures in; 317
secondary to *Enterococcus avium* in child with tetralogy of Fallot and Blalock–Taussig shunt (CR); 227
Endomyocardial biopsy, abnormal, spontaneous resolution of ventricular tachycardia in children with (CR); 364
Enterococcus avium, endocarditis in child with tetralogy of Fallot caused by (CR); 227
Ethnicity, variable affecting cardiovascular response to exercise in children; 4
Eustachian valve, acute inferior cardiac inflow obstruction resulting from inadvertent surgical closure of (CR); 155
Exercise intolerance, in asymptomatic children with Ebstein's anomaly; 189
Exercise, by children after cardiac surgery and healthy boys, velocity of oxygen uptake response at onset of; 17
cardiac performance in children and adults before and after pulmonary valvotomy in response to; 27
dynamic, normative cardiovascular responses to; 4
risks and benefits of for children and adolescents with hypertension; 66
Exercise testing, after Fontan operation; 57
as tool for rehabilitation and training; 85
before and after surgical closure of atrial septal defect, 22
before and after surgical repair of tetralogy of Fallot; 39
before and after surgical repair of; 33
in children with abnormal lipids; 71
in children with obesity, guidelines for; 79
in children with primary pulmonary hypertension; 61
in children with pulmonary valvar stenosis; 27
in patients with transposition of great arteries after atrial repair of; 49
introduction to special issue on; 1
ventilatory anaerobic threshold and transition from aerobic to anaerobic metabolism evaluated for; 12
Exercise training, variable affecting cardiovascular response to exercise in children; 4
Fabry's disease, tetralogy of Fallot may have genetic determinants in same regions (LE); 236
Failure to thrive, megastrol acetate as treatment for (A); 350
Familial association, of congenital left heart abnormalities and fetal arrhythmias (CR); 368
Familial hypertrophic cardiomyopathy, molecular genetics and; 313
resolution in neonate with mother with (CR); 208
Femoral nerve stimulation, intraperitoneal migration of epicardially placed pacemaker as cause of (CR); 164
Fetal ectopic atrial arrhythmia, familial association of congenital left heart abnormalities and (CR); 368

Fetal hydrops, severe tricuspid regurgitation in dysplastic tricuspid valve associated with (CR); 435
Fetuses, long QT syndrome diagnosed in (CR); 441
Fibrillin-1 gene, neonatal Marfan syndrome caused by deletion of exon 29 of (CR); 382
Fontan operation, exercise testing after; 57
maximal oxygen uptake reduced in children after; 17
surgical ligation of anomalous hepatic vein in heterotaxy syndrome from intrahepatic shunting after (CR); 428
Gamma globulin, effect of dose and administrative timing of on cardiac sequelae of Kawasaki disease; 248
Gender, variable affecting cardiovascular response to exercise in children; 4
Gene expression, regulation of; 94
Gene structure, overview of; 94
Genetic syndromes, congenital heart disease associated with (LE); 236
Genetics, familial hypertrophic cardiomyopathy and; 313
Glycogen storage disease type IX, isolated to heart due to cardiac phosphorylase kinase deficiency (CR); 304
Glycogenosis type IX, infantile hypertrophic cardiomyopathy caused by (CR); 304
Heart rate variability, tilt testing in children with syncope correlate with variables of; 242
Hemodynamic abnormalities, in fetuses with congenital heart disease; 390
Hemodynamics response, of obese and nonobese children to exercise testing with respect to; 79
Hemolysis, after partial coil occlusion of persistent ductus arteriosus, spontaneous resolution of (CR); 371
Heterotaxy syndrome, surgical ligation of anomalous hepatic vein for management of (CR); 428
HIA–Medos-assist device, postoperative right ventricular heart failure treated with (CR); 161
High density lipoprotein (HDL), effect of exercise on; 71
Hypertension, after repair of aortic coarctation, at rest and with exercise; 33
increased arterial stiffness in children with; 203
percutaneous transluminal balloon angioplasty in aortic arteritis relieves; 404
risks and benefits of exercise in children and adolescents with; 66
Hypertrophic cardiomyopathy, in neonates with affected mother, resolution of (CR); 208
Hypertrophic obstructive cardiomyopathy, dual chamber pacemaker therapy for (CR); 229
Hypocalcemia, cardiac dysfunction and vitamin D deficiency rickets associated with; 283
Hypoplastic left heart syndrome, adjustable systemic – pulmonary arterial shunt used after Norwood procedure for; 445
genetic/environmental factors may cause decreased prevalence in Malta of; 355
in family with sustained fetal arrhythmia (CR); 368
relation between right ventricular function and left ventricular structure in; 422
Immunoglobulin M antibody, warm reacting, echocardiographic contrast resulting from red blood cell agglutination due to (CR); 287
Infantile hypertrophic cardiomyopathy, isolated cardiac phosphorylase kinase deficiency diagnosed by (CR); 304
Inferior cardiac inflow obstruction, inadvertent surgical closure of Eustachian valve causing (CR); 155
Integrated backscatter, anthracycline-induced myocardial injury evaluated by; 264
Interleukin 6, effect of cardiac surgery in children with and without cardiopulmonary bypass on serum levels of; 113
Interleukin 8, effect of cardiac surgery in children with and without cardiopulmonary bypass on serum levels of; 113
Intraaortic balloon pump, aortic dissection in infant caused by (CR); 373
Intrahepatic shunting, after modified Fontan procedure, surgical ligation of hepatic vein for management of (CR); 428
Intravascular ultrasound, before and after redilatation for restenosis after balloon angioplasty for aortic coarctation (CR); 377
Intravenous immunoglobulin, Kawasaki disease treated by (CR); 139
reduces coronary complications while treating Kawasaki disease; 177
Ischemic heart disease, role of physical activity in avoidance of; 71
Kawasaki disease, complicated by peripheral limb gangrene (CR); 139
effects of gamma-globulin on cardiac sequelae of; 248
epidemiology, etiology, and management of; 177
level of cardiac troponin I in; 184
macro creatine kinase in (CR); 206
Killian – Pallister syndrome, tetralogy of Fallot patient with (CR); 134
Lactate, exercise and accumulation in blood of; 12
Left bundle branch morphology, spontaneous resolution of ventricular arrhythmias with (CR); 364
Left ventricular diastolic function, anthracycline-induced cardiomyopathy associated with charges in; 252
Left ventricular dysfunction, vitamin D deficiency rickets and; 283
Left ventricular function, in fetuses with congenital heart disease; 390
Left ventricular outflow tract obstruction, in adolescent with hypertrophic obstructive cardiomyopathy, pacemaker therapy for (CR); 229

in patient with atrial ventricular septal defect and Ebstein's anomaly (CR); 232
Left ventricular pump function, in congenital mitral regurgitation, role of myocardial contractility and postoperative afterload in predicting; 418
Left ventricular structure, effect on right ventricular function in hypoplastic left heart syndrome; 422
Levoatrial cardinal vein, tetralogy of Fallot with (CR); 136
Lipid abnormalities, evaluation, treatment, and exercise testing of children with; 71
Long segment stenosis, due to Takayasu's arteritis, stenting of aorta for (CR); 215
Low density lipoprotein (LDL), effect of exercise on; 71
Lymphoma, cardiac metastases from; 400
Macro creatine kinase, treatment of Kawasaki disease increases level of (CR); 206
Magnetic resonance imaging, congenital aneurysm of sinus of Valsalva rupture into right ventricle diagnosed by (CR); 212
Malta, decreased prevalence of hypoplastic left heart syndrome in; 355
Marfan syndrome, neonatal, acute mitral regurgitation due to chordal rupture in patient with (CR); 382
sudden death from aortic dissection and rupture in adolescent with (CR); 431
Megastrol acetate, failure to thrive in congenital heart disease treated by (A); 350
Mitral regurgitation, caused by chordal rupture in neonate with Marfan syndrome (CR); 382
predicting left ventricular pump function after surgical repair of; 418
Mitral valve, abnormal, anomalous origin of left coronary artery in tetralogy of Fallot associated with (CR); 438
Mitral valve atresia, abnormal contralateral atrioventricular valve in neonates with; 200
Molecular biology, introduction of; 94
Mortality, of children born with congenital heart disease between 1980 and 1990 in Bohemia; 411
Mustard operation, exercise studies after repair of transposition of great arteries by; 49
maximal oxygen uptake reduced in children after; 17
one-stage arterial switch to repair pulmonary venous obstruction following (CR); 301
Mutations, overview and diagnosis of; 94
Myocardial ischemia, reversible, in child with sickle cell disease (CR); 221
Myositis, macro creatine kinase in Kawasaki disease may result from (CR); 206
Neonates, abnormal contralateral atrioventricular valve in mitral and tricuspid atresia in; 200
ductus arteriosus aneurysm causing nerve palsies and airway compression in (CR); 158
intravascular ultrasound imaging at redilatation after balloon angioplasty (CR); 377
noninvasive external pacing for complete atrioventricular block in (CR); 290
resolution of hypertrophic cardiomyopathy in (CR); 208
transition in use of cardiac catheterization from diagnostic to therapeutic in; 131
Nerve palsy, neonatal ductus arteriosus aneurysm causing (CR); 158
Neurally mediated syncope, results and long-term outcomes of tilt testing of children with; 331
Neuroblastoma, cardiac metastases from; 400
Neurocardiac syncope, autonomic changes and heart rate variability in children with; 242
Nitric oxide, adverse hemodynamic effects following pulmonary hypertension after repair of total anomalous pulmonary venous return treated by (CR); 224
low dose, pulmonary vascular reactivity in children with congenital heart disease evaluated by inhalation of; 278
Obesity, exercise testing of children with; 79
Obstructed infracardiac total anomalous pulmonary venous connection, uncorrected, survival of adult with (CR); 152
Oxygen uptake, at onset of exercise in children after cardiac surgery and healthy boys; 17
exercise testing of obese children and; 79
Pacemaker, external, complete atrioventricular block in newborn treated by (CR); 290
Pacemaker therapy, hypertropic obstructive cardiomyopathy and rapid intrinsic atrioventricular conduction treated by (CR); 229
Parental hypertension, increased arterial stiffness in children with; 203
Partial anomalous pulmonary venous drainage, Turner's syndrome in patients with; 108
Patent ductus arteriosus, residual, after surgical ligation, transcatheter occlusion for treatment of; 126
Percutaneous transluminal balloon angioplasty, aortic stenosis due to aortic arteritis treated by; 404
Pericardial hematoma, caused by hemorrhagic pericarditis in infant (CR); 380
Pericarditis, hemorrhagic, pericardial hematoma caused by (CR); 380
Peripheral limb gangrene, Kawasaki disease complicated by (CR); 139
Persistent ductus arteriosus, spontaneous resolution of hemolysis after partial coil occlusion of (CR); 371
Persistent fifth aortic arch, aortic coarctation with double lumen aortic arch due to (CR); 167
Persistent truncus arteriosus, anomalous origin of pulmonary arteries corrected in patient with (CR); 298
Phosphorylase kinase deficiency, infantile hypertrophic cardiomyopathy caused by (CR); 304

Physical activity, effect on risk factors for ischemic heart disease; 71
Physical training, exercise training as tool for; 85
Plasma lipoprotein, mechanisms by which physical activity effects; 71
Pleuropulmonary blastoma, cardiac metastases from; 400
Postinflammatory slack skin, acute febrile dermatosis with (CR); 295
Premature infant, balloon valvuloplasty of critical pulmonary valve stenosis in (CR); 147
intraperitoneal migration of epicardially placed pacemaker causing femoral nerve stimulation in (CR); 164
Primary pulmonary hypertension, exercise testing in children with; 61
Pulmonary artery band, balloon disruption of (LE); 308
Pulmonary atresia, aortic arch anomalies associated with tetralogy of Fallot and; 97
with ventricular septal defect, branch pulmonary artery growth after Blalock–Taussig shunt in; 358
Pulmonary function, exercise testing of after atrial repair of transposition of great arteries; 49
in tetralogy of Fallot patients, exercise studies of; 39
Pulmonary hypertension, in congenital heart disease, Tc-99m hexamethyl propylenamine oxime lung clearance for diagnosing; 271
paradoxical, after inhaling nitric oxide for pulmonary hypertension after surgical repair of total anomalous pulmonary venous return (CR); 224
primary, exercise testing in children with; 61
Pulmonary valve stenosis, exercise testing in children with; 27in premature neonate, balloon valvuloplasty for treatment of (CR); 147
Pulmonary vascular resistance, of children with congenital heart disease, evaluated by inhaling low-dose nitric oxide; 278
Pulmonary venous obstruction, following Mustard operation, arterial switch to repair (CR); 301
in case of infracardiac total anomalous pulmonary venous connection (CR); 152
Radiofrequency ablation, right ventricular outflow tract tachycardia treated by (CR); 143
Red blood cell agglutination, IgM-mediated, spontaneous echocardiographic contrast resulting from (CR); 287
Rehabilitation, exercise training used for; 85
Rickets, left ventricular function and vitamin D deficiency-induced; 283
Right-to-left atrial shunt, decreased exercise tolerance in asymptomatic children with Ebstein's anomaly related to; 189
Right ventricle, MRI diagnosis of congenital aneurysm of sinus of Valsalva ruptured into (CR); 212
Right ventricular function, after atrial repair of transposition of great arteries; 49
in fetuses with congenital heart disease; 390
in hypoplastic left heart syndrome, effect of left ventricular structure on; 421
Right ventricular heart failure, HIA–Medos-assist device in treatment of (CR); 161
Right ventricular outflow tract tachycardia, radiofrequency catheter ablation of (CR); 143
Right ventricular pressure, in ventricular septal defect, color-flow Doppler echocardiographic study of; 336
Senning operation, exercise studies after repair of transposition of great arteries by; 49
maximal oxygen uptake reduced in children after; 17
Sickle cell disease, transient myocardial ischemia in child with (CR); 221
Sinus node, normal values for corrected recovery time of in adolescents; 396
Sinus node dysfunction, Doppler echocardiography with transesophageal atrial pacing for evaluating permanent atrial pacing for (CR); 218
Sinus of Valsalva, MRI diagnosis of rupture of congenital aneurysm of (CR); 212
Small left ventricle, Doppler echocardiography with transesophageal atrial pacing for evaluating permanent atrial pacing for (CR); 218
Sotalol, arrhythmia in infants and children treated with (LE); 172
Spontaneous closure, of atrial septal defect; 195
of ventricular septal defect, role of size in; 336
Spontaneous echocardiographic contrast, antibody-mediated red blood cell agglutination resulting in (CR); 287
Stenting, of aorta for recurrent long stenosis due to Takayasu's arteritis (CR); 215
Supravalvular aortic stenosis, role of elastin gene mutation in; 103
Surgical ligation, transcatheter occlusion of residual patent ductus arteriosus after; 126
Survival, of Bohemian children born with congenital heart disease between 1980 and 1990; 411
Sweet's syndrome, cardiovascular involvement in (CR); 295
Syncope, abnormal autonomic changes with tilt testing of children with; 242
neurally mediated, results and long-term outcomes of tilt testing of children with; 331
Systemic – pulmonary artery shunt, expandable and adjustable, concepts of; 445
Takayasu's disease, percutaneous transluminal balloon angioplasty for relieving stenosis of aorta due to; 404
Technetium-99m hexamethyl propylenamine oxime lung clearance, pulmonary hypertension in congenital heart disease estimated by; 271
Teratoma, malignant, cardiac metastases from; 400

Tetralogy of Fallot, associated with abnormal mitral valve, anomalous origin of left coronary artery in patient with (CR); 438
associated with aortic arch anomalies and chromosome 22q11 deletion; 97
associated with pulmonary atresia and chromosome 22q11 deletion; 97
branch pulmonary artery growth after Blalock–Taussig shunt in; 358
Enterococcus avium endocarditis in child with (CR); 227
exercise testing after surgical repair of; 39
Fabry's disease and (LE); 236
Killian – Pallister syndrome in patient with (CR); 134
levoatrial cardinal vein associated with (CR); 136
maximal oxygen uptake reduced in children after; 17
right ventricular heart failure after surgical repair of aneurysm resulting from (CR); 161
surgically repaired, effect of dobutamine on atrial and brain natriuretic peptides and cyclic guanosine monophosphate plasma concentration in patients with; 343
Tilt testing, should not be used in diagnosing neurally mediated syncope; 331
Total anomalous pulmonary venous return, adverse hemodynamic effects from inhaled nitric oxide for treating pulmonary hypertension after (CR); 224
Transcatheter occlusion, residual patent ductus arteriosus after surgical ligation treated by; 126
Transesophageal atrial pacing, role in predicting efficacy of permanent atrial pacing in patient with hypoplastic ventricle (CR); 218
Transposition of great arteries, exercise studies in patients after atrial repair of; 49
pulmonary venous obstruction after Mustard procedure for (CR); 301
Tricuspid regurgitation, in dysplastic tricuspid valve, fetal hydrops and (CR); 435
Tricuspid valve atresia, abnormal contralateral atrioventricular valve in neonates with; 200
Truncus arteriosus communis, chromosome 22q11 deletion and; 97
Turner's syndrome, prevalence of congenital heart defects and karyotype distribution in patients with; 108
Vascular dynamics, in children with parental history of hypertension; 203
Venous anomalies, combination of in child with ventricular septal defect ((LE); 170
Ventilatory anaerobic threshold, cardiorespiratory testing and; 12
exercise testing of obese children and; 79
Ventricular arrhythmias, after tetralogy of Fallot repair, electrophysiological followup for detection of; 326
in children with abnormal endomyocardial biopsy, spontaneous resolution of (CR); 364
Ventricular function, in fetuses with congenital heart disease; 390
Ventricular septal defect, chromosome 22q11 deletion and; 97
color-flow Doppler echocardiographic study of right ventricular pressure in; 336
combination or rare systemic venous anomalies in child with (LE); 170
in patient with total anomalous pulmonary venous connection (CR); 152
pulmonary atresia with, branch pulmonary artery growth after Blalock–Taussig shunt in; 358
role of size and location of in regression of right ventricular pressure; 336
Ventricular tachycardia, in children with normal heart function and abnormal endomyocardial biopsy, resolution of (CR); 364
Vitamin D deficiency, left ventricular dysfunction and rickets associated with; 283
Wall stress, role in estimating postoperative left ventricular pump function in congenital mitral regurgitation; 418
Weaver syndrome, congenital heart defects surgically repaired in patient with (CR); 375
Williams' syndrome, role of elastin gene mutation in; 103
Wilms' tumor, cardiac metastases from; 400
X monosomy, role in Turner's syndrome; 108

Pediatr Cardiol 20:462–465, 1999
